Wildland-Urban Interface Code

The Corte Madera Town Council adopted the Wildland-Urban Interface Code and the Wildland Urban Interface (WUI) Fire Area on March 18, 2008. See boundaries of the WUI Fire Area below.

The new code imposes certain regulations for exterior building materials, vegetation, firefighting water supply, and fire apparatus access on new construction projects and on remodeled existing structures where more than 50% of the exterior surface area is affected. Any new materials on the exterior of any structure in the WUI Fire Area will also need to comply with the regulations.

For more information, please refer to Chapter 7A of the 2010 California Building Code, Section 15.04 of the Town of Corte Madera Municipal Code, or the Office of the State Fire Marshall at osfm.fire.ca.gov. Please contact Roger Sprehn (415) 927-5077 at the Fire Department or Mark Flatter (415) 927-5062 at the Building Department for specific requirements.
